OVERVIEW

- Currently learning SSH tunneling and Linux administration in Cyber BOLC.
- Refining OS navigation, vulnerability assessments, and automation abilities in Debian Linux and Powershell.
- Practiced hands-on with Cisco routers, Cisco switches, and hosts, analyzing ACL, VLAN, and network configurations.
- Simulated operations in the Information Environment through exercises and briefs to military leaders.
- Graduated with a B.S. in Cognitive and Brain Sciences from Tufts University, with a minor in Computer Science.

SKILLS

Languages: Python, C++, C, HTML/CSS, Bash, PowerShell

Technologies: Linux, Protocol Analyzers, GitHub

Soft Skills: Team Development, Technical Writing/Instruction

CERTIFICATES/AWARDS

CompTIA Security+, April, 2026

Top Cadet, MIT ROTC - 2022

EXPERIENCE

303rd Cyber Battalion

May 2025 – Present

Cyber Warfare Officer

Boston, MA

- One of 34 nationally selected in year group for Army Reserve Cyber
- Train and enable soldiers for individual and team development
- Operate with the Cyber Security Company and Cyber Protection Team to provide network and host analysis on DoW systems

Center for Applied Brain and Cognitive Sciences

June 2025 – September 2025

Time-Series Data Analysis Intern

Medford, MA

- Designed and implemented neural network models using Python for time-series behavioral data classification
- Developed regression models to predict performance metrics
- Investigated Lab Streaming Layer time synchronization using Windows OS and Python to resolve errors in data compilation

MIT Army ROTC

December 2024 – May 2025

Executive Officer

Cambridge, MA

- Coordinated efforts of a 20-person HQ team to lead a 100+ person battalion
- Streamlined communication and synchronization process for HQ, utilizing a mix of doctrinal and innovative practices
